

Situational Leadership

(January 29, 2017)

Situational leadership refers to when the leader or manager of an organization must adjust his style to fit the development level of the followers he is trying to influence. The basic premise of the concept is that different situations demand different types of leadership.

A workshop was organized on 29th January 2017 on the topic for EMBA students. Capt. Ameya Kocharekar Co- founder and CEO, Proforce Professional Services Pvt Ltd. was the speaker of this workshop. He used a situational psychometric test called "situational reaction test" which is used by Service Selection Board (SSB). The entire exercise gathered different point of views as each individual has different style of leadership. A group discussion was organized as second part of exercise which aimed at justifying individual point of views and check how confident one is about the opinions expressed in writing and in verbal.
