

Industrial Visit for E-MBA Operations students

An industrial visit to Matunga Central Railway Carriage Workshop was organized for E-MBA Operations students on Saturday, 10th October 2015. The visit acted as an eye opener for the students to know and co-relate the activities with operation perspective. An organisational chart which defining the responsibilities of an individual sectional head was shown in the presentation slide before beginning with the workshop visit, the presentation also contained required facts and basic information about the workshop and Indian railways. The questions of students regarding inventory management system, quality control etc. were addressed. A physical tour to all the major plants was conducted, which gave a clear visibility on various operations, methods, safety features and quality maintenance aspects.
